Hiring Manager

Microsoft Research

Bangalore

Dear Hiring Manager,

I am excited to apply for the Research Fellowship position at Microsoft. As an engineering student specializing in Artificial Intelligence and Machine Learning at Don Bosco Institute of Technology, I have developed a strong passion for AI research and innovation. I am eager to bring my skills and enthusiasm to your team and contribute to impactful projects at Microsoft Research.

During my studies, I have gained hands-on experience through various projects, such as developing a video dubbing software and creating a PDF parser using large language models. These projects have not only strengthened my technical skills but also fueled my curiosity and drive to explore new solutions. Additionally, my virtual experience programs with Goldman Sachs, J.P. Morgan, and Mastercard have given me a solid foundation in software development and cybersecurity, where I learned to analyze complex problems and devise creative solutions.

What excites me most about this opportunity is Microsoft's reputation for pushing the boundaries of technology and its focus on advancing AI research. I am particularly interested in the chance to work with and learn from some of the best minds in the field, contributing to projects that can make a real difference.

I would love the opportunity to discuss how my background, skills, and passion align with the goals of your research team. Thank you for considering my application. I look forward to the possibility of joining Microsoft Research and contributing to its groundbreaking work.

Sincerely,

Akash Ningaiah Sthavaramatha
